Forensic Log Analysis Report

Analyzed File: sample_log_1.txt

Failed Logins: 2 occurrences

Suggested Solution: Investigate repeated failed authentication attempts (possible brute-force).

Successful Logins: 1 occurrences

Suggested Solution: Review successful login events for unusual times or IPs.

Suspicious IPs: 4 occurrences

Suggested Solution: External IP seen in events. Investigate and check IP reputation.

Large/Unauthorized Data Access: 2 occurrences

Suggested Solution: Large or sensitive data access detected. Verify the object and user's authorization.

Dangerous Commands / Remote Shells: 1 occurrences

Suggested Solution: Remote shell / destructive commands found. Isolate host and investigate the command source.

Resource Abuse (mining/DoS/high CPU): 1 occurrences

Suggested Solution: Indicators of resource abuse found. Inspect processes and network traffic.
